

JESEE MUCHOKI

Full Stack Developer & AI Engineer

Nairobi, Kenya | remowangai@gmail.com | github.com/js-muc | Open to Remote & Freelance

PROFESSIONAL SUMMARY

Self-taught Full Stack Developer and AI Engineer based in Nairobi, Kenya, with 3+ years of hands-on experience building web applications and AI-powered systems from scratch. BSc in Physics and Chemistry from the University of Embu — a scientific background that drives analytical, precise problem-solving in every project. Specialising in LLM Engineering, RAG pipelines and full stack web development using React, TypeScript, Node.js and Docker. Currently deepening expertise in Agentic AI and LLM fine-tuning.

TECHNICAL SKILLS

Frontend	JavaScript · TypeScript · React.js · Angular · HTML · CSS and Angular
Backend & Tools	Node.js · Express.js · Python · Docker · REST APIs · Git · GitHub, SQL
AI & LLM	RAG Pipelines · OpenAI API · LangChain · Hugging Face · Fine-tuning · Agentic AI

PROJECTS

Hotel Management System | React · TypeScript · Node.js · Docker

- Built a complete hotel management system from scratch covering staff management, dashboards and reporting
- Containerised with Docker for easy deployment and scalability
- Designed and implemented the full system architecture independently — frontend to backend

RAG PDF Assistant — Reasoning Document Intelligence | Python · OpenAI GPT · LangChain · FAISS

- Built a RAG pipeline that goes beyond retrieval — applies reasoning logic to filter and return precise answers from PDF documents
- Supports structured queries e.g. 'Find patients with temperature above 39' — returns only valid matches
- Applicable across healthcare, legal, finance, insurance and document-heavy industries
- GitHub: github.com/js-muc/rag_project

CBC Student Portfolio Platform | React · Node.js · Express · JavaScript — LIVE IN PRODUCTION

- Designed and deployed a full stack platform where CBC students upload and manage their project evidence
- Live in production — serving real users. Using the link:<https://studentfolio-tau.vercel.app/>
- Built complete system independently from UI design to backend API and database

EXPERIENCE

Freelance Full Stack Developer & AI Engineer | Self-Employed, Nairobi Kenya (Remote) | Jan 2023 — Present

- Designed and built complete web applications and AI systems for clients and personal projects
- Specialising in RAG pipelines, LLM integration and full stack development
- Delivered projects using React, TypeScript, Node.js, Python and Docker

- Open to freelance, contract and remote full-time opportunities globally

EDUCATION

BSc Physics and Chemistry | University of Embu, Kenya | 2017 — 2021

Developed strong analytical thinking, scientific reasoning and problem-solving skills applied daily in software engineering.

The Complete SQL Bootcamp | Udemy 2023 | Go from Zero to Hero

SQL querying, relational database design, joins, aggregations, CRUD operations and PostgreSQL fundamentals.

LLM Engineering & Agentic AI | Udemy — Dr. Ryan | 2026 — Present

RAG pipelines, fine-tuning, Hugging Face, OpenAI API and Agentic AI systems.

Full Stack Web Development Bootcamp | Udemy — Dr. Angela Yu | 2023 — 2024

HTML, CSS, JavaScript, React, Node.js, Express, REST APIs and full stack application development.

Hugging Face — AI & LLM Self-Study | Hugging Face | 2026 — Present

Model inference, leaderboards, embeddings, RAG pipelines and fine-tuning open source LLMs.

Everything I know I taught myself. Imagine what I can build for you.
